# Rittal - The System.

**Faster – better – everywhere.** 

Conditioner selection program

#### Introduction

This configurator is designed to make selecting a Rittal solution as easy and straightforward as possible.

The configurator allows you to:

- Select a similar model of air conditioner from another manufacturer;
- Select a Rittal solution by cooling capacity and type of installation or enclosure material or voltage;
- Select a Rittal solution according to the dimensions of the existing mounting cut-out and the type of installation or housing material or voltage.

#### External interface

Refrigeration capacity selection: data entry

1. Select mode «Refrigeration capacity selection»

2. Select a mounting type from the drop-down list

This section is for when a customer has a switch cabinet and needs to select an air conditioner for the required cooling capacity. The rest of the data can be left out, but the more data, the more specific the solution.

- 3. Specify the required refrigeration capacity,
- 4. Select housing material from drop-down list,
- 5. Select power supply from drop-down list,
- 6. Select indoor or outdoor from drop-down list,

Selecting an analogue: data blocks

You can scroll down to the bottom of the page - there you will find individual data blocks generated for the proposed solution from RITTAL.

They include information about model, name, appearance, additional technical data, links, performance diagrams and mounting cut-outs.

In this way, the end customer will have a better understanding of the product and will have quick and easy access to the necessary information on characteristics, dimensions and capacities.

#### Faster - Better - Everywhere

The user of this configurator will be provided with a description of the parts, including features and dimensions, as well as links to the product page and manual download.

All this is done automatically, without wasting time searching, collecting and generating data blocks for normal display and printing in PDF format.

As a result, the user of this configurator will be able to find the most FAST similar solution that is the BEST on the market, even if the user himself is offline, that is - EVERYWHERE.

- Rittal style?
- Yes!
